

## Bonus: Open Sound Control

Task Description: download an OSC app and control the “Synth” signal in sample code (bonus.scd). The tutorial shows how to use one of the OSC app, Clean OSC. This app isn’t available on google play, so you might need to borrow an iphone or ipad if you want to use Clean OSC. Also, if you use Clean OSC, it is promised that the task can be done with sample code unchanged (operating on the Clean OSC end only).

Things to submit: a video **less than 15 seconds** like demo.mp3 to show how you use OSC app to control the sample code signal.
